ESC Software Offers Two Year Free Financing For Sage Software Products Special Financing Program Applies to Sage MAS 90, 200, and 500

Tempe, AZ— May 24, 2006—ESC Software today announced a special financing option for new purchases of software and product maintenance plans. The new program provides free financing for 24 months on purchases from ESC Software of Sage MAS 90 ERP, Sage MAS 200 ERP, and Sage MAS 500 ERP.

Ongoing product maintenance and software support plan renewals are also eligible for the extended zero cost financing, and customers can take advantage of a convenient monthly payment plan instead of an annual lump sum payment.

“We are pleased to offer an extended, low cost purchasing option for our customers,” said Alan Hardy, president of ESC Software. “This financing program lets customers stretch the price of software out over 24 months, and costs them nothing additional. It’s a unique option, and we believe it will be a popular program.”

Completion of a simple and secure on line credit application starts the process, and no personal guarantee is required.
